

POLYURETHANE INSULATED JOINTS

# The insulated joint designed to handle stress

Dense polyurethane compound firmly bonds to the rail joint for reliable circuit isolation & years of heavy duty use with little or no maintenance and minimum cold flow.

Bonded To Steel Construction  
Allows Flex & Minimizes Cold Flow

Withstands Heavy Use &  
Rugged Environments

Simple DIY Installation

Rail Sizes From 30-141 lbs

Comet Track Products (formerly Seneca Railroad & Mining) provides low prices, short lead times & quality custom polyurethane products to meet our customer's needs.
