DESIGNED FOR YOUR NEEDS.

POLYURETHANE INSULATED JOINTS

Our polyurethane-insulated joints are engineered to flex under stress and minimize cold flow, thanks to durable bonded steel construction. Designed for easy DIY installation, these joints can withstand the toughest environments and heaviest loads.

FEATURES:

- Rail sizes available from 20-155 lbs
- Ideal for high-traffic and rugged applications

PROVEN TO PERFORM IN:

- Transit systems
- Grade crossings
- Signal locations
- Hump retarders
- Electric and automated railways
- Mining operations
